MEADE FEEDER SYSTEM ENROLLMENT

2008 Actual, 2009-2018 Projected

MEADE FEEDER SYSTEM ACTUAL SEPTEMBER 2008 ENROLLMENT

Meade High School

Geographic/Demographic Component:¹ Meade High School is located within census tracts 7401.02, 7403.01, 7404, 7405, 7406.01, and 7411.

Zoning:² The attendance area encompasses the Fort George G. Meade Military Base and residential areas north, northeast, and west of the post. The lower portion of the base, below the Little Patuxent River, is zoned RLD. To the north and northeast of the post zoning is primarily R-1 with areas of R-2, R-5, and R-15 Ridgefield, Provinces, and Pioneer City areas respectively. To the west zoning is of a higher density of R-5, R-10, and R-15 (Russett Center). Light to heavy industrial zoning exists along Rte 32. Several commercial zoning areas exist along Rte 198.

Sewer Service:³ Sewer service exists for all of Fort Meade, Maryland City, and the area south of Route 198. Sewer service in the Disney Road and Reece Road areas. The northern and western portions of the area are in the no planned service area. The remaining in-fill portions are in the planned service area.

Water Service:³ Water service exists for all of Fort Meade, Maryland City, and the area south of Route 198. Water service in the Disney Road and Reece Road areas. The northern and western portions of the area are in the no planned service area. The remaining in-fill portions are in the planned service area.

Development: Several large developments have been constructed or are planned within this feeder, including: Russett, Dorchester, Arundel Preserve, and Parkside (Blobs Park). Redistricting adopted by the Board of Education on April 24, 2007, also moved the Planned Unit Development of Seven Oaks into this feeder. The Meade Feeder System has been identified by the Maryland Department of Planning as a possible area of substantial growth due to BRAC. (See Appendix "Q").

Enrollment: Redistricting adopted on April 24, 2007, moved Seven Oaks to this feeder. This will cause enrollment to increase over the next six years. The establishment of a Regional International Baccalaureate Program, as well as an influx of students from BRAC, may cause a significant increase through 2018.

Planning:⁶ The 1997 Anne Arundel County General Development Plan (GDP) for this area was updated via the implementation of the Jessup/Maryland City, Severn and Odenton Small Area Plans which went into effect on April 8, 2004, September 6, 2002 and November 6, 2003 respectively. A complete revised GDP is projected for completion in 2009.

Statistical Data:¹

Population of attendance area	36,423
Number in public schools (PreK-12)	7,633
Percent in public schools.....	21%
Percent non-white.....	64%
Average home value	\$305,000
Median income.....	\$76,215

 Evaluation of physical condition - Fair

Size of existing building: 330,900 sq.ft.
 Acreage of site: 27.50 acres (Shares site with Meade Middle)

MacArthur Middle School

Geographic/Demographic Component:¹ MacArthur Middle School is located within census tracts 7401.01, 7401.02, 7402.02, 7404, 7405, 7406 and 7506.

Zoning:² The attendance area encompasses the Fort George G. Meade Military Base and residential areas north, northeast, and west of the post. The lower portion of the base, below the Little Patuxent River, is zoned RLD. To the north and northeast of the post zoning is primarily R-1 with areas of R-2, R-5, and R-15, Ridgefield, Provinces and Pioneer City areas respectively. Light to heavy industrial zoning exists along Rte 32. Several commercial zoning areas exist along Rte 198.

Sewer Service:³ Sewer service exists for all of Fort Meade, Maryland City, and the area south of Route 198. Sewer service in the Disney Road and Reece Road areas. The northern and western portions of the area are in the no planned service area. The remaining in-fill portions are in the planned service area.

Water Service:³ Water service exists for all of Fort Meade, Maryland City, and the area south of Route 198. Water service in the Disney Road and Reece Road areas. The northern and western portions of the area are in the no planned service area. The remaining in-fill portions are in the planned service area.

Development: The mixed-use development of Parkside is planned for this area. With over 1,000 units proposed, this development could have a major impact on enrollment.

The Residential Community Initiative Project (RCI) on Fort Meade will rebuild housing on the post and add additional, larger housing units. This project will be totally built out by 2010 and may yield over 700 new elementary students, 250 middle students and 80 senior students. This major initiative will impact the Meade Feeder System.

Enrollment: Excess capacity is available in this facility. It is believed that the current capacity will handle the middle school growth projected from RCI and BRAC (See Appendix "Q": BRAC).

Planning:⁶ The 1997 Anne Arundel County General Development Plan (GDP) for this area was updated via the implementation of the Jessup/Maryland City, Severn and Odenton Small Area Plans which went into effect on April 8, 2004, September 6, 2002 and November 6, 2003 respectively. A complete revised GDP is projected for completion in 2009.

Meade Middle School

Geographic/Demographic Component:¹ Meade Middle School is located within census tracts 7401.01, 7401.02, 7402.02, 7404, 7405, 7406 and 7506.

Zoning:² The attendance area encompasses the Fort George G. Meade Military Base and residential areas north, northeast, and west of the post. The lower portion of the base, below the Little Patuxent River, is zoned RLD. To the north and northeast of the post zoning is primarily R-1 with areas of R-2, R-5, and R-15, Ridgefield, Provinces and Pioneer City areas respectively. To the west zoning is of a higher density of R-5, R-10, and R-15 (Russett Center). Light to heavy industrial zoning exists along Rte 32. Several commercial zoning areas exist along Rte 198.

Sewer Service:³ Sewer service exists for all of Fort Meade, Maryland City, and the area south of Route 198. Sewer service in the Disney Road and Reece Road areas. The northern and western portions of the area are in the no planned service area. The remaining in-fill portions are in the planned service area.

Water Service:³ Water service exists for all of Fort Meade, Maryland City, and the area south of Route 198. The northern and western portions of the area are in the no planned service area. The remaining in-fill portions are in the planned service area.

Development: Several subdivisions are in varying stages of planning for this area. Combined, these subdivisions may have a significant impact on enrollment in the future.

Enrollment: Enrollment is projected to increase through 2018.

Planning:⁶ The 1997 Anne Arundel County General Development Plan (GDP) for this area was updated via the implementation of the Jessup/Maryland City, Severn and Odenton Small Area Plans which went into effect on April 8, 2004, September 6, 2002 and November 6, 2003 respectively. A complete revised GDP is projected for completion in 2009.

Size of existing building: 150,000 sq.ft.
Acreage of site: 27.4 (Shares site with Meade High School)

Brock Bridge Elementary School

Geographic/Demographic Component:¹ Brock Bridge Elementary School is located within the census tract 7405.

Zoning:² The Brock Bridge attendance area is zoned open space in the western portion along the Patuxent River, except for the Russett PUD where higher density residential units are under construction. The remainder of land already in the Maryland City Development is zoned R-5. Land for potential residential development within the current boundaries is unavailable.

Sewer Service:³ Sewer service exists for all of the attendance area.

Water Service:³ Water service exists for all of the attendance area.

Development: Although the Meade Feeder System has been identified as a potential area of growth resulting from BRAC, few subdivisions have been planned for this area due to a lack of school capacity. Growth may continue as a result of the turnover of existing housing.

Enrollment: Enrollment should decline slightly, or remain stable, as a result of the Board of Education redistricting adoption on April 24, 2007.

Planning:⁶ The 1997 Anne Arundel County General Development Plan (GDP) for this area was updated via the implementation of the Jessup/Maryland City, Severn and Odenton Small Area Plans which went into effect on April 8, 2004, September 6, 2002 and November 6, 2003 respectively. A complete revised GDP is projected for completion in 2009.

 Current Relocatables: 4

Frank Hebron-Harman Elementary School

Geographic/Demographic Component:¹ Frank Hebron-Harman Elementary School is located within census tracts 7401.01 and 7402.02.

Zoning:² The Frank Hebron-Harman attendance area is zoned primarily R-5 and R-2. Frank Hebron-Harman's zoning also consists of a non-contiguous area known as Meade Village Apartments, which is zoned R-15. The northernmost section is zoned R-5, with portions of light industrial development and commercial districts, i.e., Parkway Industrial Center.

Sewer Service:³ The Meade Village area and the area adjacent to the school has existing sewer service. The remaining areas adjacent to Route 713 and Clark Road are in the planned service area.

Water Service:³ The Meade Village area and the area adjacent to the school has existing water service. The outlying areas to the north and west are in the future service area.

Development: This area has experienced a very high rate of residential development in the past five years, primarily due to the availability of utilities. The Dorchester Planned Unit Development (PUD) is located in this area. Redistricting adopted by the Board of Education on April 24, 2007, placed the Arundel Preserve subdivision in this school boundary.

Enrollment: Enrollment has increased due to increased building of new homes in the Harman area. The build out of the Dorchester Planned Unit Development may continue to have significant impacts on enrollments for this area.

Planning:⁶ The 1997 Anne Arundel County General Development Plan (GDP) for this area was updated via the implementation of the Jessup/Maryland City, Severn and Odenton Small Area Plans which went into effect on April 8, 2004, September 6, 2002 and November 6, 2003 respectively. A complete revised GDP is projected for completion in 2009.

Acreage of site: 18.81 acres

Jessup Elementary School

Geographic/Demographic Component:¹ Jessup Elementary School is located within census tracts 7401.01, 7401.02, and 7404.

Zoning:² Jessup attendance area is zoned predominately R-1. Provinces and Holiday Mobile Home are zoned R-5, and Richfield Drive within Pioneer City is zoned R-15.

Sewer Service:³ The Richfield Drive area has existing sewer service. The remaining areas adjacent to Route 295, Route 713 and Clark Road are in the planned service area.

Water Service:³ The Richfield Drive area has existing water service. The remaining areas adjacent to Route 295, Route 713 and Clark Road are in the planned service area.

Development: This area has experienced a moderate rate of residential development in the past five years. Two major subdivisions, Parkside (Blobs Park) and Arundel Preserve were redistricted to Meade Heights Elementary and Frank Hebron-Harman Elementary respectively by the Board of Education action on April 24, 2007.

Enrollment: Enrollment should hold steady and below capacity for the next several years.

Planning:⁶ The 1997 Anne Arundel County General Development Plan (GDP) for this area was updated via the implementation of the Jessup/Maryland City, Severn and Odenton Small Area Plans which went into effect on April 8, 2004, September 6, 2002 and November 6, 2003 respectively. A complete revised GDP is projected for completion in 2009.

Manor View Elementary School

Geographic/Demographic Component:¹ Manor View Elementary School is located within census tract 7406.

Zoning:² Manor View Elementary School is located on the Fort George G. Meade Military Base. The central portion of the Manor View attendance area is located on post at Fort Meade. Base housing of MacArthur Manor attends Manor View.

Sewer Service:³ Sewer service exists for all of the attendance area.

Water Service:³ Water service exists for all of the attendance area.

Development: This The Residential Community Initiative Project (RCI) continues on Fort Meade and will rebuild housing on the post and add additional, larger housing units. This project will be totally built out by 2008 and may yield over 700 new elementary students, 250 middle students and 80 senior students. This major initiative will impact the Meade Feeder System.

Enrollment: Enrollment projections increase substantially due to the Residential Communities Initiative (RCI) Program and BRAC. (See Appendix "Q").

Planning:⁶ The 1997 Anne Arundel County General Development Plan (GDP) for this area was updated via the implementation of the Jessup/Maryland City, Severn and Odenton Small Area Plans which went into effect on April 8, 2004, September 6, 2002 and November 6, 2003 respectively. A complete revised GDP is projected for completion in 2009.

Maryland City Elementary School

Geographic/Demographic Component:¹ Maryland City Elementary School is located within census tracts 7405 and 7401.02.

Zoning:² The Maryland City attendance area is zoned R-5, with a small portion of R-10 and R-15. The area south of Route 198 is receiving sewer and water services. The area north of Route 198 (Russett Center) zoning is consistent with the elements of a planned unit development consisting of commercial, residential (R-3, R-5, R-15, R-22) , and open space.

Sewer Service:³ Sewer service exists for most of the attendance area.

Water Service:³ Water service exists for most of the attendance area.

Development: This area has experienced a very low rate of residential development.

Enrollment: Redistricting adopted by the Board of Education on April 24, 2007, has increased enrollment at this school slightly. Enrollment growth is also due to a turnover of existing housing.

Planning:⁶ The 1997 Anne Arundel County General Development Plan (GDP) for this area was updated via the implementation of the Jessup/Maryland City, Severn and Odenton Small Area Plans which went into effect on April 8, 2004, September 6, 2002 and November 6, 2003 respectively. A complete revised GDP is projected for completion in 2009.

Date of Occupancy: 1965

Addition/Renovation

Evaluation of physical condition - Fair

Size of existing building: 49,130 sq.ft.

Acreage of site: 13.867 acres

Current Relocatables: 3

Meade Heights Elementary School

Geographic/Demographic Component:¹ Meade Heights Elementary is located within census tracts 7401.01, 7403.01, and 7406.

Zoning:² Meade Heights Elementary School is located on post at Fort George G. Meade. The Reece Heights area is zoned R-2. The southern portion of this attendance area is zoned R-5 and R-15 (Jackson Grove).

Sewer Service:³ Sewer service exists for all of the attendance area.

Water Service:³ Water service exists for all of the attendance area.

Development: The Planned Unit Development of Seven Oaks was redistricted out of this attendance area on April 24, 2007. The Residential Community Initiative Project (RCI) on Fort Meade continues rebuilding housing on the post and adding additional, larger housing units. Redistricting adopted by the Board of Education on April 24, 2007, moved the proposed mixed-use development of Parkside (Blobs Park) from Jessup Elementary to Meade Heights Elementary. That same redistricting moved Richfield Drive from Jessup Elementary to Meade Heights Elementary. The mixed-use development of Parkside, with over 1,000 units proposed, could have a major impact on enrollment.

Enrollment: The projected enrollment decreased substantially due the creation of boundaries for Seven Oaks Elementary. The 1,003 unit subdivision of Parkside (Blobs Park) will, over time, increase the enrollment of this school. This school will be hosting Pershing Hill Elementary School during the construction of the new Pershing Hill Elementary School.

Planning:⁶ The 1997 Anne Arundel County General Development Plan (GDP) for this area was updated via the implementation of the Jessup/Maryland City, Severn and Odenton Small Area Plans which went into effect on April 8, 2004, September 6, 2002 and November 6, 2003 respectively. A complete revised GDP is projected for completion in 2009.

Pershing Hill Elementary School

Geographic/Demographic Component:¹ Pershing Hill Elementary is located within census tract 7406.

Zoning:² Pershing Hill Elementary School is located on post at Fort George G. Meade. It is served with water and sewer services from government installation. No subdivision activity is planned for this area.

Sewer Service:³ Sewer service exists for all of the attendance area.

Water Service:³ Water service exists for all of the attendance area.

Development: This area has not experienced residential development in the past five years. The Residential Community Initiative Project (RCI) on Fort Meade will rebuild housing on the post and add additional, larger housing units. This major initiative will impact the Meade Feeder System.

Enrollment: Enrollment is projected to remain steady. Beginning in the summer of 2009, Pershing Hill Elementary School will be replaced. Students will be sharing space at Meade Heights Elementary School during the construction project.

Planning:⁶ The 1997 Anne Arundel County General Development Plan (GDP) for this area was updated via the implementation of the Jessup/Maryland City, Severn and Odenton Small Area Plans which went into effect on April 8, 2004, September 6, 2002 and November 6, 2003 respectively. A complete revised GDP is projected for completion in 2009.

Seven Oaks Elementary School

Geographic/Demographic Component:¹ Seven Oaks Elementary is located within census tract 7403.01.

Zoning:² The attendance area is zoned R-5, R-15, R-22 and O-NOD.

Sewer Service:³ Sewer service exists for all of the attendance area.

Water Service:³ Water service exists for all of the attendance area.

Development: The Planned Unit Development of Seven Oaks makes up virtually the entire attendance area. This community is near completion.

Enrollment: Boundaries were established April 24, 2007. Enrollment at Seven Oaks Elementary is projected to increase initially, but remain stable thereafter over the next ten years.

Planning:⁶ The 1997 Anne Arundel County General Development Plan (GDP) for this area was updated via the implementation of the Jessup/Maryland City, Severn and Odenton Small Area Plans which went into effect on April 8, 2004, September 6, 2002 and November 6, 2003 respectively. A complete revised GDP is projected for completion in 2009.
