

Makerspace at Jacobsville!

What is a Makerspace?

A Makerspace is a place for students to think critically, creatively and cooperatively to MAKE things while developing 21st century learning skills. In November and December all grades will make something with cardboard.

Where and when?

Students will be using Makerspaces in the Jacobsville Library during their library classes. We will use our STEAM skills to create exciting projects!

How can I help?

You can support our Makerspace by donating the following supplies to Mrs. Richards in

- ♦ **Thin Cardboard** (easy to cut with scissors)
- ♦ **Cereal boxes**
- ♦ **Food boxes**
- ♦ **Legos**
