

ADVANCED CO-CURRICULAR PROGRAMS

Accomplishment related to Value #2, Indicator #14

Advanced Co-Curricular Programs support the AACPS 2018-23 Strategic Plan by offering students (and their family) choices in their education. Students who are engaged in related activities outside their classroom walls feel a part of the greater school community, establish positive relationships, and often transfer enthusiasm back to their academics and classroom participation.

AACPS offers a wide range of [Advanced Co-Curricular Programs](#), designed to complement the curriculum and provide a direct link to classroom instruction. These programs, which may meet before, during or after school, give students the chance to explore an interest in a specific subject or topic. Designed to engage a wide range of students, the county offers dozens of opportunities with varied themes and topics, which extend learning experiences beyond what students experience in the classroom.

There are three types of Advanced Co-Curricular Programs at AACPS:

- **Clubs** - activities, focused on a specific topic that are offered through each school for students and/or families with a special interest.
- **Adjunct Programs** - activities offered outside of the school day by partners in the community, which offer students the chance to pursue and develop their interest while connecting with the community.
- **Competitions** - activities (often held in conjunction with a club) which allow students to compete in academic challenges at the local, state, and national levels.

ADVANCED CO-CURRICULAR PROGRAMS

NOTE: Due to the nature of data becoming available in late summer or early fall, 2018-2019 Stem and Humanities student participation data by school will be posted when it becomes available.
