ANNE ARUNDEL COUNTY PUBLIC SCHOOLS
NOTIFICATION
OF AVAILABILITY OF ASBESTOS
MANAGEMENT PLANS

On October 22, 1986, the United States Congress enacted the Asbestos Hazard Emergency Response Act (**AHERA**). The final rule, published October 30, 1987, requires all public and private elementary and secondary schools to address various asbestos issues including inspections, development of management plans, notifications, training, operations and maintenance activities, response action, post-response action activities, re-inspections and periodic surveillance activities that are planned or are in progress.

The Anne Arundel County Public Schools' asbestos management program has been structured to fulfill the AHERA requirements. A management plan developed for each facility outlines our program and AHERA compliance activities. All personnel who work in an Anne Arundel County Public Schools facility are instructed to: (1) review the management plan prior to performing work, and (2) not disturb asbestos containing materials. Accredited, licensed asbestos abatement professionals will perform all asbestos-related abatement activities.

For buildings completed after October 12, 1988, our management plan consists of the exclusion documentation including this notification. This documentation indicates that to our knowledge, no asbestos-containing building materials were used or specified in the construction of these buildings. These schools are as follows:
