<tbody>
<tr>
<td>● The process and structure of the sessions. Members valued the clear organization, dedicated time for each step, and the opportunity to collaborate and reach consensus. They also enjoyed interacting with diverse perspectives and working in small groups that are different each time.</td>
<td>● If the final product will keep pace with rapid changes, truly preparing our kids for the next two decades. I also wonder how student involvement at this level might alter the responses and overall approach.</td>
<td>● We could continue this collaborative process, fostering buy-in and understanding among a wider audience.</td>
</tr>
<tr>
<td>● The positive aspects of the meeting experience. Participants appreciated the facilitator’s guidance, the peaceful and collaborative atmosphere, the chance to learn about the process, and the opportunity to share data and opinions openly.</td>
<td>● How this entire initiative will turn out compared to past efforts. I wonder where AACPS would be today if a similar program had existed 20 years ago.</td>
<td>● Clearer communication about the final editing process, ensuring major themes are captured.</td>
</tr>
<tr>
<td>● If we truly represent all students as effectively as we believe. I wonder if there’s more to be done in developing goals, considering it seems like a majority of this work hasn’t been touched.</td>
<td>● What the final product will actually look like and when we can expect concrete action steps or goals to be created.</td>
<td>● There was more time for discussions and more large group discussion/sharing of ideas and questions.</td>
</tr>
<tr>
<td>● We could share more broadly the steering committee work with the broader community so they have an understanding of how this is coming together.</td>
