

Know Before You Go

Your money, your health, your decision

Choosing the right setting for your care—from allergies to X-rays—is key to getting the best treatment with the lowest out-of-pocket costs. It's important to understand your options so you can make the best decision when you or your family members need care.*

Primary care provider (PCP)

The best place to get consistent, quality health care is your primary care provider (PCP). If you have a medical issue, having a doctor who knows your health history often makes it easier to get the care you need.

24-Hour Nurse Advice Line

Registered nurses are available 24/7 to discuss your symptoms with you and recommend the most appropriate care. Call 800-535-9700 anytime to speak with a nurse.

CareFirst Video Visit

When your PCP isn't available and you need urgent care services, CareFirst Video Visit securely connects you with a doctor, day or night, through your smartphone, tablet or computer. In addition, you can schedule visits for other needs such as behavioral health support from a therapist or psychiatrist, guidance from a certified nutritionist or breastfeeding support from a lactation consultant. It's a convenient and easy way to get the care you need, wherever you are. Visit carefirstvideovisit.com to get started.

Convenience care centers (retail health clinics)

These are typically located inside a pharmacy or retail store (like CVS MinuteClinic or Walgreens Healthcare Clinic) and offer care for non-emergency situations like colds, pink eye, strep tests and vaccinations. These centers usually have evening and weekend hours.

Urgent care centers

Urgent care centers (such as Patient First or ExpressCare) provide treatment for injuries and illnesses that require prompt medical attention but are not life-threatening (sprains, minor cuts, flu, rashes, minor burns). These centers have doctors on staff and offer weekend/after-hours care.

Emergency room (ER)

Emergency rooms treat acute illnesses and trauma. Go to the ER right away if you or a family member have sudden symptoms that need emergency care, including (but not limited to): chest pain, trouble breathing or head trauma. Prior authorization is not needed for emergency room services.
