

#WeekendSpotlight

Construction & Development

Hands -on!

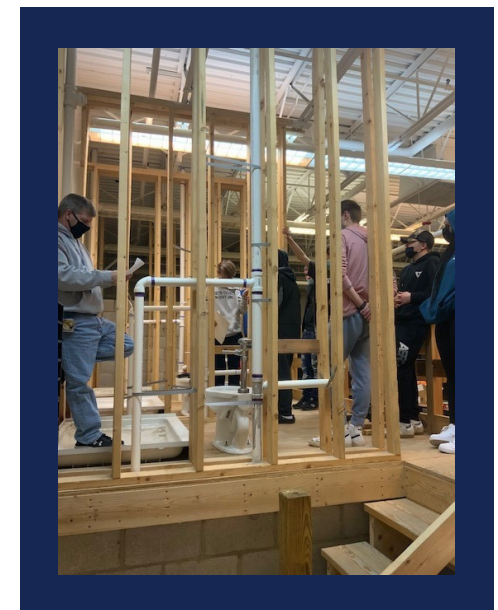

Masonry

Carpentry

Are you interested in helping people when they need it or making their dreams come true? Whether it is a leaky pipe, a remodeling job, or a dream home, the construction industry is a rewarding place to build a career. At CAT North, students put classroom knowledge to work through hands-on activities, developing skills, technical knowledge, and work habits needed to succeed in carpentry, electrical, plumbing, masonry, integrated design, HVAC, industrial maintenance, and welding.

Our eight programs encompass the breadth of construction trades and provide students with skills and certifications for future success. Teachers infuse AVID strategies and other engaging techniques to improve learning in the classroom - fortifying those skills needed in the shop!

Students exploring plumbing systems
