MISSION

AAEHS provides a dynamic academic program that is mindful of individual differences and learning styles.

The AAEHS mission is to successfully prepare our students to transition to post-secondary education and/or the work force.

As a non-traditional setting, we empower students to be self-confident life-long learners who serve as active citizens engaging in a reciprocal relationship with their community.

VISION

The AAEHS program consists of six campuses as well as an ESchool serving a culturally and economically diverse population.

Working collaboratively, our program will emphasize mastery learning and differentiated instruction throughout the curriculum to achieve common core learning goals.

It is the vision of Evening High School to provide students with renewed opportunities to be successful in order to exceed their potential as growing learners.

As a result, students will earn a high school diploma and meet national reading, writing, and math standards.
